DETAILED ACTION

Receipt is acknowledged of the request for continued examination filed 04/16/2009.

The rejection under 35 USC 102(b) over Hook et al is withdrawn in view of applicant's amendment.

The following is a new rejection based on the new and newly amended claims:

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2, 4-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant has amended the claims and added new claims which contain limitations not found in the original specification. Applicant must additionally show that the original specification of the priority document supported these amendments in order to maintain priority.

A showing must be made from the original specification or from the priority document (if the information is to be added to the original specification in a continuation of this application). Further, if applicant does not have support but can show that these characteristics are inherent to the claimed protein, this must be provided in declaration form. Showings from other patents or documents do not provide support for new matter in this application. As such, the newly added limitations are considered new matter until some sort of support can be shown.
